I listen to Xm radio and I find the fact that you are even considering banning them from broadcasting traffic and weather to be ludicrous. Regular radio only give traffic update every half and hour or so. But with a channel dedicated to my area I can find out instantly what I NEED to know. I am paying these good people for these services and it should not be up to you what they can or cannot be allowed to broadcast this is NOT public radio, it is Private.

I urge you to reject petition 04-160.
